>>> RESPIRATORY PROTECTION

SURVIVAIR OPTI-FIT™ CONVERTIBLE

APR / PAPR / CF-SAR

One full facepiece, many solutions.

The Survivair Opti-Fit™ convertible full facepiece respirator can be used for various respiratory applications:

- **APR** (Air Purifying Respirator)
- **PAPR** (Powered Air Purifying Respirator)
- **CF-SAR** (Constant Flow – Supplied Air Respirator)

The Survivair Opti-Fit Convertible respirator is NIOSH-Approved for all three configurations. Now, you can customize the Survivair Opti-Fit for your environment and needs.

The convertible system allows users to switch the facepiece from various applications (APR, PAPR, CF-SAR) without having to change facepieces.

Simply use the facepiece caps with the appropriate ports to convert applications. Only one fit test needed for APR, PAPR and CF-SAR applications. This saves on inventory, time and cost.

One facepiece works with all configurations.

SURVIVAIR OPTI-FIT™ CONVERTIBLE

APR / PAPR / CF-SAR

Survivair Opti-Fit Convertible Facepiece

- Choose from a 5-point strap or black industrial mesh headnet to fit your comfort and needs
- Wide viewing area offering distortion free visibility and optical clarity
- Silicone skirt offers exceptional durability and comfort
- All straps are attached to the rim of the facepiece, rather than the silicone skirt, to reduce pressure points and distortion of the sealing surface when tightened

Ordering Information

Survivair Opti-Fit Convertible APR

- Choose from many S-Series cartridges and filters for your environment
- For a complete Sperian S-Series cartridge offering, go to www.survivair.com

Survivair Opti-Fit Convertible CF-SAR

The Survivair CF-SAR Opti-Fit full facepiece can be configured for a side mounted tube or front mounted tube. The Survivair Opti-Fit CF-SAR is also available in an Egress (escape) configuration with P100 filters.

- Connects to an airline hose by using a high-volume, low pressure, durable rubber breathing tube. A light weight plastic breathing tube is available in the side port configuration
- *For Side Port:* Breathing tube attaches to one of the side cartridge ports (the other port and the front nozzle inlet ports are capped off)
- *For Front Port:* Breathing tube attaches to one front inlet nozzle port (the side ports are capped off)
- Complete Survivair Opti-Fit CF-SAR contains a Survivair Opti-Fit full facepiece, cap, breathing tube and waist belt. Kits are also available without facepiece
- Couplings and airline hose sold separately
